

Data Consolidation

Get the Whole Picture with Insight e-Tools Data Consolidation

Insight e-Tools, together with ADP, solve the challenges of obtaining a consolidated view of business critical information for an entire multi-location organization. Companies that have grown through mergers and acquisitions, are operating in the U.S. and Canada, and/or have separate installations of ADP no longer need to spend hours piecing information together from individual reports to see the big picture.

Regardless of the ADP payroll platform, location, or varying pay frequencies, Insight e-Tools automatically...

- Imports the necessary data from each payroll installation or any external data source
- Consolidates it into a single reporting environment
- Standardizes the data to produce all reports in a consistent format

... making it easy for managers and decision makers to get the information they need.

“The ROI of this product was realized instantly. We were able to save time, improve accuracy, and more easily manage our company-wide TPA files.”
