

# Overcome Unique Reporting Challenges with ADP & Insight e-Tools

Insight e-Tools is an ADP solutions provider dedicated to helping ADP provide niche solutions to prospects with custom reporting needs. By choosing to couple your ADP services with Insight e-Tools, you will be able to expand the use of your payroll data to create reports that are necessary for your unique business needs.

## *Vertical reporting solutions simplified...*

### **State Required Public Agency Reporting**

By automatically importing payroll data, applying state rules, and collecting new or additional information, Insight e-Tools is able to greatly reduce the time it takes to create accurate state required retirement reports for cities, charter schools, and other public agencies.

### **Consolidated Reporting**

Often a challenge for companies who grow through mergers and acquisitions, Insight e-Tools is able to close the information gap by consolidating data into a single reporting environment where managers and decision makers can view critical business information reflective of the entire company. Sources of consolidation include:

- **Multi-location Installs of PC Payroll**
- **Different Front-end Platforms**
- **U.S. and Canada**

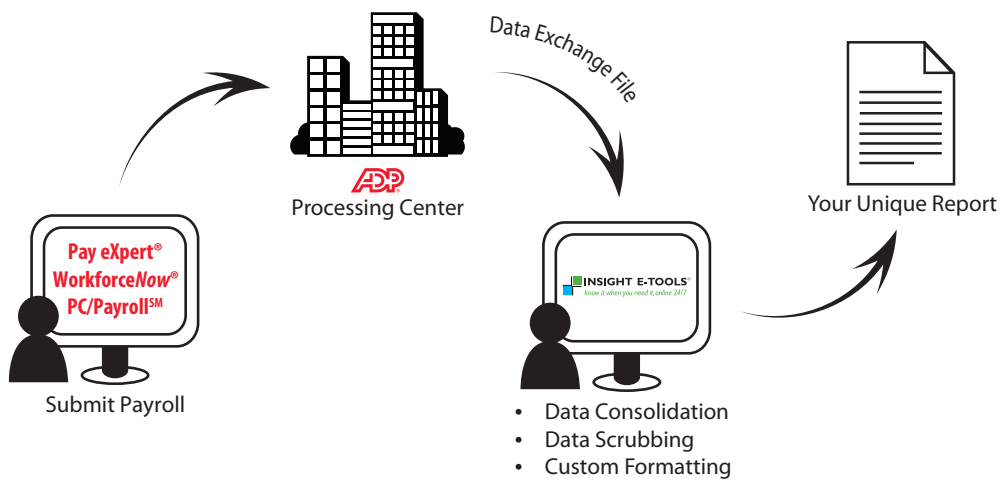

### **Overhead Reporting of Employer Taxes and Contributions**

Used for reports such as total compensation statements and burden bill-back for property management companies, Insight e-Tools creates custom reports that include employer taxes and contributions. Reports that take hours to create manually are automatically generated with the required payroll and management report data, and custom calculations are instantly applied.

## About Insight e-Tools

Insight e-Tools was developed in 1997 to provide industry solutions that allow businesses to gain immediate insight from their payroll and HR data. As an alliance partner to ADP, Insight e-Tools is a hosted, web-based data access and automatic report generating system that extends the functionality of ADP PC Payroll and Pay eXpert reporting for niche vertical solutions. Thousands of companies across North America are using Insight e-Tools to generate instant customized reports and replace paper payroll reports with online distribution of data. Insight e-Tools imports data from multiple sources through a data exchange file directly from ADP. Then Insight e-Tools consolidates and cleans the raw data to create whatever customized output is required.

## How it Works
