

Labor Distribution

Control Labor Costs with Online Labor Distribution Reports

Keeping an eye on labor costs help companies remain competitive and control expenses. Managers, who see where their department's labor expenditures are at all times, can be proactive and plan more effectively. Knowing if employees are working too much overtime or using excessive paid leave can avert potential problems before they become major issues. The challenge to obtain relevant payroll data is often-times not easy and for companies with multiple locations, is costly to distribute.

With Insight e-Tools, managers and executives, regardless of their location, have immediate online access to the labor cost reports that are most important to them, including ...

- Labor cost analysis in summary or in detail
- Hours and earnings by department, account or job
- Employer paid taxes and contributions

Securely delivered via Insight by e-Mail and the Manager's Dashboard.

“We used to spend an entire day after each payroll downloading and manipulating reports. With Insight e-Tools, I can login and instantly get the reports I need in order to manage our operations. It's amazing!”
