FOR IMMEDIATE RELEASE

## **Insight e-Tools Delivers Critical Business Updates**

### *Business Decision Makers Benefit from Online Push Technology*

**Seattle, Wash.** — February 20, 2006 — Pay Plus Solutions, the makers of Insight e-Tools, today announced its product's ability to utilize push technology to deliver vital human resources and payroll status updates directly to corporate managers and decision makers. Insight e-Tools is a business software solution that eliminates a company's need for the cumbersome use of manual payroll spreadsheets by providing online access to payroll and HR data.

Insight by e-Mail follows user-defined criteria to identify particular situations within a company's payroll and HR data and sends an e-mail notification to the people within the company who need to know. Among the multitude of scenarios that can be monitored, a CEO can track a department's labor-costs or an HR manager can be updated with overdue personnel review dates or possible misuses of overtime. Each Insight by e-Mail is delivered via secure setting and Insight e-Tools drill-down capability can be utilized once the user is appropriately logged in. This way, users can quickly and easily discover the specific data behind the information received in the Insight by e-Mail.

“People running businesses today cannot risk the wait involved in the traditional method of receiving payroll and human resources reports,” says John Heaton, President and Founder of Pay Plus Solutions. “Insight by e-Mail identifies a wide range of critical business matters from payroll data and allows managers to react quicker to make better business decisions.”

**About Insight e-Tools**

Used nationwide by 9,000 businesses with 500,000 employees, Insight e-Tools generates business efficiencies by providing instant, online access to vital payroll and employee data. Insight e-Tools creates accurate payroll-related reports, eliminating the need for manual spreadsheets and time-consuming analysis. Executives receive pertinent cost and human resource information automatically, eliminating the need to wait for reports from other departments. Managers gain powerful and quick insight into labor costs and personnel data from multiple time frames and departments. Insight e-Tools is highly secure, using role-based data access, and is offered as a hosted solution by Pay Plus Solutions.
